

PAINING INSTRUCTIONS- The cast styrene parts have been given a light coat of primer. If you use lacquer paints such as Floquil or Scalecote use barrier coat to prepare the sides first. Use thin layers of paint to get the most detail. Approximate collar match: ROCK ISLAND BLUE, 2 parts RR-56 GN blue, 1 part RR-11 Reefer white.

DECAL INSTRUCTIONS- All surfaces should have a gloss finish. Use solvaset diluted with H₂O for these decals. Add a drop of liquid detergent (Lux, etc.) to the decal soaking water.
